

Outdoor (Dusk to Dawn) Lighting

Program

Maquoketa Valley Electric Cooperative will install and maintain LED and high-pressure sodium yard or flood lights for a small monthly fee.

Metered versus Unmetered Pricing

As referenced below, the “metered” rate means the kWh’s used by the new light will register on your meter and be billed as part of the total kWh’s used at your location. Lights will generally be installed as metered, if practicable. The “unmetered” rate means the light will be installed before the meter. Both metered and unmetered lights will be assessed a monthly power cost adjustment (PCA) per kWh and applicable taxes. (The PCA is the fluctuating increase or decrease in power costs per kilowatt hour purchased over the base rate costs.)

Poles

Installation on an existing, qualified pole is allowed. New poles may be purchased from the Cooperative.

Line Extension

Additional costs may be charged if the line extension is over 140 feet or if underground service is requested or required.

Pricing

48 Watt Equivalent LED Yard Light

\$9.25/Month Unmetered
\$6.40/Month Metered

250 Watt High-Pressure Sodium Yard Light

\$12.35/Month Unmetered
\$6.40/Month Metered
